

LONG WARM WINTER      Ellen Ochs      c 1987

You've never seen December grass so green,    It's gonna be a long warm winter.

You've never heard so many birds,    It's gonna be a long warm winter.

And when you look at me on a cozy night, I feel like someone just lit all the lights!

You've never seen December stars so bright! (It's gonna be a long warm winter!)

2) You'll never meet December air so sweet,    It's gonna be a long warm winter.

Twigs 'round the bend budding out again - It's gonna be a long warm winter.

When you come through that door and you bring that smile,

    My feet miss the floor by a country mile!

Snowflakes come down but they just melt in style! (It's gonna be a long warm winter!)

3) There's never been so much hay to get in, it's gonna be a long warm winter.

Bumper crop of corn as sure as you're born - It's gonna be a long warm winter.

And when I look up suddenly and see your face,

    My heart beats like it just won a marathon race!

How'd this get to be such a beautiful place? It's gonna be a long warm winter!
